The aims of the Global Goals are to achieve three extraordinary things in the next 15 years; end poverty, fight inequality & injustice and tackle climate change - for everyone.

193 world leaders have now adopted these aims and committed to addressing 17 Goals.

Project Everyone, founded by Richard Curtis, aims to both make the goals famous and to push for their full implementation. If the goals are famous- if people care about what has been promised by the politicians, it greatly increases their chance of being implemented.

Richard Curtis said: "In just 7 days we're halfway towards achieving the ambitious goal of telling everyone in the world about the UN Global Goals. Knowledge is power and country by country people are starting to find out about the plan their politicians have made. We all need to know what our rights are in order to claim them. This simple idea of 'telling everyone' about the goals means that we can now begin to hold our politicians to account in addressing the 17 core issues brought to the world's attention at the Sustainable Development Summit on 25th September. Their final aim will be to make us the first generation to end extreme poverty, the most determined generation to end inequality and injustice and the last generation to be threatened by climate change."

I hope we can now continue to spread the message of the goals to everyone to help make them a reality by 2030. And work towards an annual day where everyone will be encouraged to focus on the Goals, the progress made so far and what needs to be addressed in the years and years ahead to achieve their final goal."

Stephen Hawking said: "2015 is the year world leaders sign up to the Global Goals. They are an ambitious to do list to eradicate poverty, save the environment, and make the world a fairer place for everyone. To save the world we need everyone to tell everyone."

Notes to Editors:

Project Everyone has worked with a range of partners including Blue 449, Boston Consulting Group, Crimson Hexagon and ThreePointZero, all of whom have lent their expertise to help us estimate our global reach across all known campaign activities.

We have based our estimated reach on available data across each of our activities, including:

- Commitments from Ministries of Education in 103 countries to support the World's Largest Lesson for a combined 500 million children
- Social media estimated reach based on 1.3 million posts with potential views of 13 billion and estimated actual views of 2.6 billion for the campaign to date (Source: www.crimsonhexagon.com)
- Global Citizen Festival coverage to air in 150 countries (Source: BBC Worldwide)
- Daily unique visitors for each of our online partners
- Available weekly audience figures from over 600 radio partners in 75 countries
- Estimated TV viewing figures of 700 million, including exposure to concert, news items and TV spot airtime, modeled on known viewing figures to date
- PR opportunities to see (OTS) of 1.4bn for coverage to date
- Estimated exposure to over 140,000 digital OOH screens from 125 media owners in 450 cities across 28 countries
- Global cinema ad showing in 34 countries

From this combination of sources Blue 449 have forecast 11 billion as the likely number of impressions and

estimated 40% of the global population having had an opportunity to see one more more of our activities.

ABOUT THE GLOBAL GOALS FOR SUSTAINABLE DEVELOPMENT

The Sustainable Development Goals are at the heart of the ambitious new global agenda that have been agreed and adopted by the 193 Member States at the Sustainable Development Summit which took place September 25th-27th, 2015, in New York at the United Nations. More than 160 world leaders were in New York to adopt the goals -- which builds on the UN's successful Millennium Development Goals (2000-2015) that have lifted millions out of poverty. This

THE GLOBAL GOALS
For Sustainable Development

new agenda will build on the successes and go further because it is a universal agenda that will improve the lives of all people around the world.

Through an integrated approach, the goals will tackle the social, economic and environmental challenges to achieve sustainable development to meet the needs of the present without compromising the ability of future generations to meet their own needs. The new Sustainable Development agenda will guide all countries on a path that will transform the lives of all people toward increased prosperity and greater well-being while protecting the environment.
